

**Date: 21/OCT/2010**

**Dear Atlantis solar**

**We started the relationship with you ( Atlantis solar) 9 months ago and we ordered few products to test and monitor like the solar A/C, Solar street light, and the light fixtures.**

**We had to test and feel your products to insure that it meets our target. We spent these few months testing and monitoring your products.**

**We tested the solar thermal air-conditioning and the solar street light. The products were wonderful and the quality was very good. The light had to deal with extreme conditions like strong dust storms, wind and heavy rain and it was still working well.**

**We were satisfied from the samples we used for instance the light was very bright and still working well. The solar air conditioning is also great although we didn't test how much electricity it saves but it looks and feel good.**

**Now, after all that experience we can now move forward to open a showroom for your solar and lighting products in Saudi Arabia Riyadh city.**

**We will be looking for 2 to 3 samples from each product you do and works with us here in Saudi. We signed an agreement with you and we are looking forward that you sign your part and send a copy to us soon.**

**It was our pleasure to share with you our experience about your products and we are looking forward to hear from you very soon.**

**Best regards,,,,,**

**Yazeed Al Madi**

**Saudi Arabia  
Riyadh**
